SAMSUNG

Free Standing Appliance

Safety information

SAFETY INFORMATION

- Before operating the appliance, please read this manual thoroughly and retain it at a safe place near the appliance for your future reference.
- Use this appliance only for its intended purpose as described in this instruction manual. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Warnings and Important Safety Instructions in this manual do not cover all possible conditions and situations that may occur. It is your responsibility to use common sense, caution, and care when installing, maintaining, and operating your appliance.

- Because these following operating instructions cover various models, the characteristics of your refrigerator may differ slightly from those described in this manual and not all warning signs may be applicable. If you have any questions or concerns, contact your nearest service center or find help and information online at www.samsung.com.

Important safety symbols and precautions :

 WARNING	Hazards or unsafe practices that may result in severe personal injury or death.
 CAUTION	Hazards or unsafe practices that may result in minor personal injury or property damage.
	Do NOT attempt.
	Do NOT disassemble.
	Do NOT touch.
	Follow directions carefully.

	Unplug the power plug from the wall socket.
	Make sure the machine is grounded to prevent electric shock.
	Call the contact center for help.
	Note.

These warning signs are here to prevent injury to you and others.

Please follow them carefully. After reading this section, keep it in a safe place for future reference.

CE Notice

This product has been determined to be in compliance with the Low Voltage Directive (2006/95/EC), the Electromagnetic Compatibility Directive (2004/108/EC), RoHS Directive (2011/65/EU), Commission Delegated Regulation (EU) No 1060/2010 and the Eco-Design Directive (2009/125/EC) implemented by Regulation (EC) No 643/2009 of the European Union. (For products sold in European Countries only)

SEVERE WARNING SIGNS FOR TRANSPORTATION AND SITE

- When transporting and installing the appliance, care should be taken to ensure that no parts of the refrigerating circuit are damaged.
- R600a or R134a is used as a refrigerant. Check the compressor label on the rear of the appliance or the rating label inside the refrigerator to see which refrigerant is used for your refrigerator.
- When this product contains flammable gas (Refrigerant R600a),
 - Refrigerant leaking from the pipe work could ignite or cause an eye injury. If a leak is detected, avoid any naked flames or potential sources of ignition and air the room in which the appliance is standing for several minutes.
 - In order to avoid the creation of a flammable gas-air mixture if a leak in the refrigerating circuit occurs, the size of the room in which

the appliance may be sited depends on the amount of refrigerant used.

- Never start up an appliance showing any signs of damage. If in doubt, consult your dealer. The room where the refrigerator will be sited must be 1 m³ in size for every 8 g of R600a refrigerant inside the appliance. The amount of refrigerant in your particular appliance is shown on the identification plate inside the appliance.
- If the appliance contains isobutane refrigerant (R600a), a natural gas with high environmental compatibility that is, however, also combustible. When transporting and installing the appliance, care should be taken to ensure that no parts of the refrigerating circuit are damaged.

SEVERE WARNING SIGNS FOR INSTALLATION

- Do not install this appliance in a humid, oily or dusty location, in a location exposed to direct sunlight and water (rain drops).
- Deteriorated insulation of electrical parts may cause an electric shock or fire.
- Do not place this refrigerator in direct sunlight or expose to the heat from stoves, room heaters or other appliances.
- Do not plug several appliances into the same multiple power board. The refrigerator should always be plugged into its own individual electrical outlet which has a voltage rating that matched the rating plate.
- This provides the best performance and also prevents overloading house wiring circuits, which could cause a fire hazard from overheated wires. If the wall socket is loose, do not insert

the power plug.

- There is a risk of electric shock or fire.
- Do not use a cord that shows cracks or abrasion damage along its length or at either end.
- Do not bend the power cord excessively or place heavy articles on it.
- Do not use aerosols near the refrigerator.
- Aerosols used near the refrigerator may cause an explosion or fire.
- Do not install this appliance in a location where gas may leak.
- This may result in an electric shock or fire.

- The installation or any service of this appliance is recommended by a qualified technician or service company.
- Failing to do so may result in an electric shock, fire, explosion, problems with the product, or injury.
- This refrigerator must be properly installed and located in accordance with

the manual before it is used.

- Connect the power plug in proper position with the cord hanging down.
- If you connect the power plug upside down, wire can get cut off and cause fire or an electric shock.
- Make sure that the power plug is not squashed or damaged by the back of the refrigerator.
- When moving the refrigerator, be careful not to roll over or damage the power cord.
- This constitutes a fire hazard.
- The appliance must be positioned so that the plug is accessible after installation.

- The refrigerator must be grounded.
- You must ground the refrigerator to prevent any power leakages or electric shocks caused by current leakage from the refrigerator.
- Never use gas pipes, telephone lines or other potential lightning rods as ground.

- Improper use of the ground plug can result in an electric shock.

- If the power cord is damaged, have it replaced immediately by the manufacturer or its service agent.
- The fuse on the refrigerator must be changed by a qualified technician or service company.
- Failing to do so may result in an electric shock or personal injury.
- Contact with a service center if any damage is found after removing the packing materials.

CAUTION SIGNS FOR INSTALLATION

- Keep ventilation opening in the appliance enclosure or mounting structure clear of obstruction.
- Allow the appliance to stand for 2 hours after installation.

SEVERE WARNING SIGNS FOR USING

- Do not insert the power plug with wet hands.
- Do not store articles on the top of the appliance.
- When you open or close the door, the articles may fall and cause a personal injury and/or material damage.
- Do not put items filled with water on the refrigerator.
- If spilled, there is a risk of fire or electric shock.
- Do not let children hang on the door.
- Failure to do so may cause serious personal injury.
- Do not leave the doors of the refrigerator open while the refrigerator is unattended and do not let children enter inside the refrigerator.
- Do not allow babies or children go inside the drawer.
- It can cause death from suffocation by entrapment or personal injury.
- Do not store volatile or flammable substances such as benzene, thinner, alcohol, ether or LP gas in the

refrigerator.

- The storage of any of such products may cause an explosion.
- Do not store low temperature-sensitive pharmaceutical products, scientific materials or other low temperature-sensitive products in the refrigerator.
- Products that require strict temperature controls must not be stored in the refrigerator.
- Do not place or use electrical appliance inside the refrigerator, unless they are of a type recommended by the manufacturer.
- Do not use a hair dryer to dry the inside of the refrigerator. Do not place a lighted candle in the refrigerator for removing bad odors.
- This may result in an electric shock or fire.
- Do not touch the inside walls of the freezer or products stored in the freezer with wet hands.
- This may cause frostbite.
- Do not use mechanical

devices or any other means to accelerate the defrosting process, other than those recommended by the manufacturer.

- Do not damage the refrigerant circuit.

- This product is intended only for the storage of food in a domestic environment.
- Bottles should be stored tightly together so that they do not fall out.
- In the event of a gas leak (such as propane gas, LP gas, etc.), ventilate immediately without touching the power plug. Do not touch the appliance or power cord.
- Do not use a ventilating fan.
- A spark may result in an explosion or fire.
- Use only the LED Lamps provided by manufacturer or service agent.
- Children should be supervised to ensure that they do not play with and/or climb into the appliance.

- Do not disassemble or repair the refrigerator by yourself.
- You run a risk of causing a fire, malfunction and/ or personal injury. In case of malfunction, please contact your service agent.

- If the appliance generates a strange noise, a burning or smell or smoke, unplug the power plug immediately and contact your nearest service center.
- Failing to do so may result in an electric or fire hazards.
- If you experience difficulty when changing the light, contact service agent.
- If the products is equipped with the LED Lamp, do not disassemble the Lamp Cover and LED Lamp by yourself.
- Please contact your service agent.
- If any dust or water is in the refrigerator, pull out power plug and contact your Samsung Electronics service center.
- There is a risk of fire.

8_ Safety information

CAUTION

CAUTION SIGNS FOR USING

- To get best performance from the product,
- Do not place foods too closely in front of the vents at the rear of the appliance as it can obstruct free air circulation in the refrigerator compartment.
- Wrap the food up properly or place it in airtight containers before putting it into the refrigerator.
- Do not put any newly introduced food for freezing near to already existing food.
- Do not place carbonated or fizzy drinks in the freezer compartment. Do not put bottles or glass containers in the freezer.
- When the contents freeze, the glass may break and cause personal injury and property damage.
- Do not change or modify the functionality of the refrigerator.
- Changes or modifications may result in a personal injury and/or property

damage. Any changes or modifications performed by a 3rd party on this completed appliance are neither covered under Samsung warranty service, nor is Samsung responsible for safety issues and damages that result from 3rd party modifications.

- Do not block air holes.
- If the air holes are blocked, especially with a plastic bag, the refrigerator can be over cooled. If this cooling period lasts too long, the water filter may break and cause water leakage.
- Do not put any newly introduced food for freezing near to already existing food.
- Please observe maximum storage times and expiry dates of frozen goods.
- Do not spray volatile material such as insecticide onto the surface of the appliance.
- As well as being harmful to humans, it may also result in an electric shock, fire or problems with the product.
- When you open the door, be careful not to injure yourself.

CAUTION SIGNS FOR CLEANING AND MAINTENANCE

- Do not directly spray water inside or outside the refrigerator.
- There is a risk of fire or electric shock.
- Do not use or place any substances sensitive to temperature such as inflammable sprays, inflammable objects, dry ice, medicine, or chemicals near the refrigerator. Do not keep volatile or inflammable objects or substances (benzene, thinner, propane gas, etc.) in the refrigerator.
- This refrigerator is for storing food only.
- This may result in a fire or an explosion.
- Do not spray cleaning products directly on the display.
- Printed letters on the display may come off.
- Remove any material or dust from the power plug pins. But do not use a wet or damp cloth when cleaning the plug, remove any foreign

material or dust from the power plug pins.

- Otherwise there is a risk of fire or electric shock.

- Unplug the refrigerator before cleaning and performing maintenance.
- In case of not using for a long time, turn off the power and clean inside of the appliance, and then leave it with the door opened

SEVERE WARNING SIGNS FOR DISPOSAL

- Ensure that none of the pipes on the back of the appliance are damaged prior to disposal.
- R600a or R134a is used as a refrigerant. Check the compressor label on the rear of the appliance or the rating label inside the refrigerator to see which refrigerant is used for your refrigerator. When this product contains flammable gas (Refrigerant R600a), contact your local

authority in regard to safe disposal of this product. Cyclopentane is used as an insulation blowing gas. The gases in insulation material require special disposal procedure. Please contact your local authorities in regard to the environmentally safe disposal of this product. Ensure that none of the pipes on the back of the appliances are damaged prior to disposal. The pipes shall be broken in the open space.

- When disposing of this product or other refrigerators, remove the door/door seals, door latch so that small children or animals cannot become trapped inside. Leave the shelves in place so that children may not easily climb inside. Children should be supervised to ensure that they do not play with the old appliance.
- Please dispose of the packaging material for this product in an environmentally friendly manner.

ADDITIONAL TIPS FOR PROPER USAGE

- In the event of a power failure, call the local office of your Electricity Company and ask how long it is going to last.
- Most power failures that are corrected within an hour or two will not affect your refrigerator temperatures. However, you should minimize the number of door openings while the power is off.
- Should the power failure last more than 24 hours, remove all frozen food.
- If keys are provided with the refrigerator, the keys should be kept out of the reach of children and not be in the vicinity of the appliance.
- The appliance might not operate consistently (possibility of temperature becoming too warm in the refrigerator) when sited for an extended period of time below the cold end of the range of temperature for which the refrigerating appliance is designed.
- Do not store food which spoils easily at low temperature, such as bananas, melons.
- Your appliance is frost free, which means there is no need to manually defrost your appliance, as this will be carried out automatically.
- Temperature rise during defrosting can comply with ISO requirements. But if you want to prevent an undue rise in the temperature of the frozen food while defrosting the appliance, please wrap the frozen food up in several layers of newspaper.
- Any increase in temperature of frozen food during defrosting can shorten its storage life.

Saving Energy Tips

- Install the appliance in a cool, dry room with adequate ventilation.
- Ensure that it is not exposed to direct sunlight and never put it near a direct source of heat (radiator, for example).
- Never block any vents or grilles on the appliance.
- Allow warm food to cool down before placing it in the appliance.
- Put frozen food in the refrigerator to thaw. You can then use the low temperatures of the frozen products to cool food in the refrigerator.
- Do not keep the door of the appliance open for too long when putting food in or taking food out. The shorter time for which the door is open, the less ice will form in the freezer.
- Clean the rear of the refrigerator regularly. Dust increases energy consumption.
- Do not set temperature colder than necessary.
- Ensure sufficient air exhaust at the refrigerator base and at the back wall of the refrigerator.
- Do not cover air vent openings.
- Allow clearance to the right, left, back and top when installing.
- This will help reduce power consumption and keep your energy bills lower.

Setting up your refrigerator

GETTING READY TO INSTALL THE REFRIGERATOR

Congratulations on your purchase of the Samsung refrigerator.

We hope you enjoy the state-of-art offers.

Selecting the best location for the refrigerator

- A location without direct exposure to sunlight.
- A location with level (or nearly level) flooring.
- A location with enough space for the refrigerator doors to open easily.
- Allow sufficient space to the right, left, back and top for air circulation.

If the refrigerator does not have enough space, the internal cooling system may not work properly.

- Please ensure that appliance can be moved freely in the event of maintenance & service.

- Height of the product may be different depending on the models.
- Allow clearance to the right, left, back and top when installing. This will help reduce power consumption and keep your energy bills lower.
- Do not install the Refrigerator where the temperature will go below 50 °F (10 °C).

REVERSING THE DOOR

Before you reverse the refrigerator door, make sure to unplug the refrigerator. Samsung recommends that reversing of the door opening is only completed by Samsung approved Service providers. This will be on a chargeable basis and at the customers expense.

 Any damage caused while attempting to reverse the door opening is not covered under the appliance manufacturers warranty. Any repairs requested due to this circumstance will be completed on a chargeable basis at the customers expense.

1. Before attempting to reverse the refrigerator doors ensure that the refrigerator is disconnected from the main electricity supply and all food stuffs are emptied from inside the appliance.
2. If the customer does not feel confident to follow instruction in the user manual, a Samsung qualified service engineer must be contacted to carry out this change.
3. Do not plug in Refrigerator just after door reverse finished process and wait for at least one hour.

Required Tools

Not provided		
		
Phillips Head Driver (+)	Flat Head Driver (-)	10 mm Socket Wrench (for bolts)
Not provided		Additional part
		
11 mm Wrench (for hinge shaft)	3/16" Allen Wrench (for middle hinge)	Top Left Hinge Case (Underneath the Cover Hinge)

14_ Setting up

1. Remove the Hinge Cover and detach the sensor from the right Hinge Cover.

2. Remove bolts (①) and disconnect the wire (②).

3. Remove the Wire Covers (①) and Door Cover (②).

4. Remove the Hinge and detach Hinge Case from the hinge. Pull the wires out from the Hinge Case.

5. Remove the fridge door from the Middle hinge by carefully lifting the door straight up.

The door is heavy, be careful not to injure yourself when removing the door.

6. Disassemble the Middle hinge.

7. Remove the freezer door from the Bottom hinge by carefully lifting the door straight up.

CAUTION The door is heavy, be careful not to injure yourself when removing the door.

8. Lay the refrigerator carefully. Switch the position of Bottom Hinge and Leg.

9. Remove the screw on the bottom right side of the fridge and freezer door. Switch Door Stopper(①), Grommet(②) and Bracket(③) from the right to the left.

10. Switch the position of Grommet and Cap screws.

CAUTION Be careful not to injure yourself during operation.

11. Carefully put the freezer door back on. Assemble the Middle hinge.

12. Use 11 mm wrench to separate the Top hinge shaft. Flip the Top hinge and reattach the Top hinge shaft.

13. Carefully put the Fridge door back on and assemble the hinge.

14. Assemble the Hinge case to the hinge.
(Use left hinge case which can be found underneath the Hinge Cover).

Incorrect

Correct

-  Take out the door switch from right Hinge case and assembly it in left Hinge case.
Door switch must be positioned code number up for correct work.

15. Assemble the Wire Covers (①) and Door Cover (②).

16. Connect wires and Assemble the Hinge Cover.

17. Switch the handles from the left to the right.

18. Detach the Fridge and the Freezer door gaskets and then attach them after rotating them 180°.

LEVELLING THE REFRIGERATOR

If the front of the appliance is slightly higher than the rear, the door can be opened and closed more easily. Turn the adjusting legs clockwise to raise and counter-clockwise to lower the height.

Case 1) The appliance tilts down to the left.

- Turn the left adjusting leg in the direction of the arrow until the appliance is level.

Case 2) The appliance tilts down to the right.

- Turn the right adjusting leg in the direction of the arrow until the appliance is level.

16_ Setting up

Operating your refrigerator

CHECKING THE CONTROL PANEL

Each time you press the button, a short beep will sound.

1 Fridge

Press the Fridge button to set the fridge to desired temperature from the range between 1 °C and 7 °C. Default set temperature is set on 3 °C and each time you press the Fridge button, temperature will change in following order and temperature indicator will display the desired temperature.

(TYPE A, B)	<div> <div>3 °C</div> <div>2 °C</div> <div>1 °C</div> <div>7 °C</div> </div> <div> <div>4 °C</div> <div>5 °C</div> <div>6 °C</div> </div>
(TYPE C)	<div> <div>3 °C</div> <div>2 °C</div> <div>1 °C</div> </div> <div> <div>5 °C</div> <div>7 °C</div> </div>

Press and hold this button for 3 seconds to activate the Vacation function. (TYPE A)

2 Freezer

Press the Freezer button to set the freezer to desired temperature from the range between -17 °C and -23 °C. Default set temperature is set on -20 °C and each time you press the Freezer button, temperature will change in following order and temperature indicator will display the desired temperature.

(TYPE A, B)	<div> <div>-20 °C</div> <div>-21 °C</div> <div>-22 °C</div> <div>-23 °C</div> </div> <div> <div>-19 °C</div> <div>-18 °C</div> <div>-17 °C</div> </div>
(TYPE C)	<div> <div>-20 °C</div> <div>-21 °C</div> <div>-23 °C</div> </div> <div> <div>-19 °C</div> <div>-17 °C</div> </div>

Fridge or Freezer temp indicator will blink when temperature in the fridge or freezer compartment goes up dramatically by storing warm food or frequent door opening. (Fridge or Freezer temperature indicator will stop blinking when temperature in the fridge or freezer becomes normal. If temperature indicator does not stop blinking after several hours, please contact your service center.

Press this button for 3 seconds to activate the Power Freeze function. Power Freeze indicator (❄️) will light up and the refrigerator will speed up the time to needed to freeze products in the freezer. This function will be activated for 50 hours and freezer indicator will display -23 °C. This function switches off automatically. When the Power Freeze process is completed, the Power freeze indicator switches off and the freezer switches back to the previous temperature setting. When you use this function, the energy consumption will increase. To deactivate this function, press the Freezer button for 3 seconds.

If you need to freeze large amount of food stuff, activate Power Freeze function 20 hours before.

3 Alarm

1. Door alarm

Press this button to activate the Door alarm function. Alarm indicator (🔔) will light up and the refrigerator will alert you with alarm sound if the refrigerator door is kept open for longer than 2 minutes. To deactivate the this function, press the Alarm button again.

2. Temperature Alarm

(For (TYPE A,B) control panel models)

Press this button to activate the Temperature alarm function. The alarm indicator (🔔) will light up. If the freezer compartment is too warm because there has been a power failure, the signal of “- -” flashes on the display. When the Freezer button is pressed, the “warmest temperature” which has reached in the freezer compartment is flashed on the display for five seconds. Then the actual temperature is indicated. To deactivate the Temperature Alarm function, press the Alarm button again.

This warning may operate ;

- when the appliance is turned on
- the freezer compartment is too warm due to a power failure.

④ Cool Select Zone

Quick Cool()

- If you want to cool down food quickly, store food in Cool Select Zone and Select Quick Cool Mode.
- Cool Select Zone will cool food for 60 minutes.
- When Quick Cool mode is completed, the Cool Select Zone drawer will automatically set the mode to Cool.

Zero Zone()

- When you select Zero Zone mode, temperature of the Cool Select Zone will be set on 0 °C.
- Activate this Chill function for the storage of highly perishable foodstuffs.

Cool()

- When you select Cool mode, temperature of the Cool Select Zone will be set on 3 °C.

⑤ Smart Eco

- This icon () will light up when the refrigerator is activated with the optimized energy efficiency.
- Without additional controls, it keeps food freshness automatically by many sensors detecting the inner and outside temperature and minimizes energy consumption.

⑥ Vacation

Press the Vacation button to activate the Vacation function.

Vacation indicator () will light up and the refrigerator will set the temperature to 15 °C to minimize the power consumption when you are going on a long vacation or business trip or you do not need to use the refrigerator.

While Vacation function is activated, freezer compartment remains on.

Vacation function will be automatically deactivated if you adjust fridge temperature while Vacation function is on.

Make sure to remove foods in the fridge compartment before using Vacation function.

- Some of the feature such as Water Tank, Ice Maker, Wine Rack, Fresh Room, Salad Box, Cool Select Zone, guards can be different and may not be available depending on the models.
- To get more space in the freezer, you can remove drawers and supports except ①, ② drawers.

It does not affect thermal and mechanical characteristics.

A declared storage volume of the freezer compartment is calculated with these parts removed.

- The fruits or the vegetables could get frozen in fresh room.(optional)
- To get the best energy efficiency of this product, please leave all shelves, drawers and baskets on their original position like as illustration.

MAKING ICE

1. Fill the tray up to 80% with water level.
2. Place the ice tray in the top freezer drawer.
3. Wait until the ice cubes are formed.
4. Twist the ice tray slightly to take out the ice cubes.

Freezing time

It is recommended that you wait for about 1~2 hour with the temperature set to Power Freeze for the ice cubes to form.

Danger of explosion

- The coldest parts of the refrigerator is the rear panel.

This is the best place to store delicate foodstuffs.

- Glass bottles containing liquids should never be stored in the freezer as the glass can shatter when the contents freeze.

USING THE WATER DISPENSER (OPTIONAL)

Filling the water

You can fill the water with the water tank sitting inside of the refrigerator or you can remove the water tank to fill the water.

Method 1

Fill the water through the hole on the top of the water tank.

If you pour the water too fast, water may overflow.

Method 2

1. Release the lock on the both side of the water tank to remove the lid on the water tank.
2. Fill the water in the water tank.

Do not put anything other than water in the water tank.

- If water dripping occur after first filling, the water tank pour some water approximately 500 ml.

Getting water from the dispenser

Place a glass underneath the water outlet and push it gently against the water dispenser lever with your glass.

- Make sure the glass is in line with the dispenser to prevent the water from splashing out.
- Water dispenser may not be available depending on the model.

REMOVING THE INTERIOR PARTS

Shelves

Gently lift up the shelves with both hands and pull it toward you.

Door guards

Firmly grab the door guards with both hands and lift it up gently to remove the door guards.

Water tank

Firmly grab the water tank with both hands and lift it up towards you gently to remove the water tanks.

- Water tank may not be available depending on the model.

Drawers

Pull the drawers out fully then slightly lift it up to remove the drawers.

(Fresh Room Drawer, Cool Select Zone Drawer, Freezer Drawers)

CLEANING THE REFRIGERATOR

WARNING

Do not use Benzene, Thinner or Clorox™ for cleaning.

They may damage the surface of the appliance and can create a risk of fire.

WARNING

Do not spray the refrigerator with water while it is plugged in, as it may cause an electric shock.

Do not clean the refrigerator with benzene, thinner or car detergent for risk of fire.

WARNING

Clean by using a soft cloth with neutral detergent.

REPLACING THE LED LAMP

When the interior or exterior LED lamp has gone out, do not disassemble the lamp cover and LED lamp by yourself.

Please contact your service agents.

Troubleshooting

PROBLEM	SOLUTION
The appliance is not operating at all or the temperature is too high.	<ul style="list-style-type: none"> • Check if the power plug is correctly connected. • Is the temperature control on the front panel correctly set? • Does sun shine on the appliance or are there any heat sources nearby? • Is the back of the appliance too close to the wall?
The food in the refrigerator is frozen.	<ul style="list-style-type: none"> • Is the temperature control on the front panel set to the coldest temperature? • Is the surrounding temperature too low?
There are unusual noises.	<ul style="list-style-type: none"> • Check if the appliance is installed on a stable and even floor. • Is the back of the appliance too close to the wall? • Have any foreign objects fallen behind or under the appliance? • Is the noise coming from the compressor in the appliance? • A ticking sound occurs when the various accessories contract or expand.
The front corners and sides of the appliance are warm and condensation starts to form.	<ul style="list-style-type: none"> • Heat-proof pipes are installed in the front corners of the appliance to prevent condensation from forming. When the surrounding temperature rises, this may not always be effective. However, this is not abnormal. • In very humid weather, condensation may form on the outer surface of the appliance when the moisture in the air comes into contact with the cool surface of the appliance.
You can hear a liquid bubbling in the appliance.	<ul style="list-style-type: none"> • This is the refrigerant, which cools the inside of the appliance.
There is a bad smell inside the appliance.	<ul style="list-style-type: none"> • Is there any spoiled food inside of the refrigerator? • Make sure that strong smelling food (for example, fish) is wrapped so that it is airtight. • Clean out your refrigerator periodically and throw away any spoiled or suspect food.
There is a layer of frost on the appliances walls.	<ul style="list-style-type: none"> • Are the air outlet vents blocked by food stored inside the refrigerator? • Space the food out as much as possible to improve ventilation. • Is the door fully closed?
Condensation forms on the inside wall of the appliance and around vegetables.	<ul style="list-style-type: none"> • Food with a high water content is stored uncovered with a high humidity level or the door has been left open for a long time. • Store the food with a cover or in sealed containers.

Circuit diagram

memo

Ambient Room Temperature Limits

This refrigerator is designed to operate in ambient temperatures specified by its temperature class marked on the rating plate.

Class	Symbol	Ambient Temperature range (°C)
Extended Temperate	SN	+10 to +32
Temperate	N	+16 to +32
Subtropical	ST	+16 to +38
Tropical	T	+16 to +43

-  Internal temperatures may be affected by such factors as the location of the refrigerator, ambient temperature and the frequency with which you open the door. Adjust the temperature as required to compensate for these factors.

Correct Disposal of This Product (Waste Electrical & Electronic Equipment)

English

(Applicable in countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal.
